END-OF-YEAR EXAMINATION 2020

SECONDARY ONE EXPRESS

MATHEMATICS PAPER 1

1 HOUR 15 MINUTES

Candidates answer on the Question Paper.

READ THESE INSTRUCTIONS FIRST

Write your index number and name on all the work you hand in.
Write in dark blue or black pen.
You may use an HB pencil for any diagrams or graphs.
Do not use staples, paper clips, glue or correction fluid.

Answer all questions.

If working is needed for any question it must be shown with the answer.

Omission of essential working will result in loss of marks.

The use of an approved scientific calculator is expected, where appropriate.

If the degree of accuracy is not specified in the question, and if the answer is not exact, give your answer to three significant figures. Give answers in degrees to one decimal place.

For π , use either your calculator value or 3.142, unless the question requires the answer in terms of π .

At the end of the examinations, fasten your work securely together.
The number of marks is given in brackets [] at the end of each question or part question.
The total of the marks for this paper is 50.

For Examiner's Use

Answer **all** the questions.For
Examiner's
Use

1 (a) Calculate $\frac{13.6^2 - 4}{\sqrt{3.5 + 3}}$.

Write down the first 5 digits on your calculator display.

Answer _____ [1]

(b) Write your answer to part (a) correct to 3 decimal places.

Answer _____ [1]

2 By rounding off each number to 2 significant figures, estimate the value of

$$51323 \div 9.96$$

You must show your working clearly.

Answer _____ [2]

3 Simplify $2y + 3(y + 4x)$.

Answer _____ [2]

For
Examiner's
Use

For
Examiner's
Use4 Factorise completely $24ax - 16ay$.For
Examiner's
Use

Answer _____ [2]

5 The numbers p, q, r and s are represented on the number line.The values of p, q, r and s are listed below.

$$\frac{1}{3} \quad 33.3\% \quad \frac{\sqrt{2}}{2} \quad \frac{\pi}{4}$$

Find p, q, r and s .Answer $p =$ _____ $q =$ _____ $r =$ _____ $s =$ _____ [2]

For
Examiner's
Use

- 6 The diagram below is formed by two triangles BDE and ACE .
 AC is parallel to ED .

For
Examiner's
Use

- (a) Find
 (i) x ,

Answer $x =$ _____ [1]

- (ii) y ,

Answer $y =$ _____ [1]

- (iii) z .

Answer $z =$ _____ [1]

- (b) Explain if AE is parallel to BD .

Answer

[1]

For
Examiner's
Use

- 7 Express $\frac{7x}{3} - \frac{2x-y}{2}$ as a single fraction in its simplest form.

For
Examiner's
Use

Answer _____ [3]

- 8 The diagram shows a semi-circle with diameter $AC = 12$ cm.
 $AB = \frac{1}{4} AC$ and a semi-circle is drawn with AB as the diameter.
 Find the perimeter of the shaded region.

Answer _____ cm [3]

For
Examiner's
Use9 Two gyms, *A* and *B*, offer usage charges as shown in the graphs.For
Examiner's
Use

- (a) How much does Gym *A* charge for usage for 20 minutes?

Answer \$ _____ [1]

- (b) Jim would like to spend \$4 to use one of the gyms.
Which gym offers more usage time?

Answer Gym _____ [1]

- (c) Provide a possible explanation as to why the graph for Gym *B* only starts at 20 minutes.

Answer

_____ [1]

For
Examiner's
Use

- 10 Ben went on a trip to New York.
The exchange rate was Singapore dollars (SGD) 1 = US dollars (USD) 0.7312.

For
Examiner's
Use

- (a) Ben exchanged SGD 4500 for USD.
Calculate the amount of USD he had received. Give your answer to 2 decimal places.

Answer USD _____ [1]

- (b) Ben had USD 1500 remaining after his trip. He exchanged them back to SGD. The exchange rate remained at SGD 1 = USD 0.7312.
Calculate the amount he had spent on his trip, to the nearest SGD.

Answer SGD _____ [2]

- 11 Adam, Ben and Cayden share a sum of money.
The ratio of Adam's money to Ben's is in the ratio 3 : 5.
Cayden has 1.5 times the money that Ben has.

- (a) Find the ratio of Adam's money to Ben's money to Cayden's money.

Answer _____ : _____ : _____ [2]

- (b) If Cayden has \$90 more than Adam, find the total amount of money the three of them have.

Answer \$ _____ [2]

For
Examiner's
Use

12

For
Examiner's
Use

- (a) Find the gradient of the line.

Answer _____ [1]

- (b) Write down the y -intercept of the line.

Answer _____ [1]

- (c) Write down the equation of the vertical line that passes through $(2, 0)$.

Answer _____ [1]

For
Examiner's
Use

- 13 The temperature of a waffle was $-6D$ when it was taken from the freezer.
The waffle was placed in an oven.
The temperature rose at a constant rate for 10 minutes.
At the end of 10 minutes, the temperature was $18D$.

Find

- (a) the temperature after 5 minutes,

For
Examiner's
UseAnswer _____ D [2]

- (b) the number of minutes it took to reach $0D$.

Answer _____ minutes [2]

For
Examiner's
Use

14 (a) $w = \frac{1}{3}(a^2 + b)$.

Find the value of w if $a = -2$ and $b = 3$.For
Examiner's
UseAnswer $w =$ _____ [2]

(b) Solve $\frac{32}{x-3} = 8$.

Answer $x =$ _____ [2]

For
Examiner's
Use

- 15 (a) Construct quadrilateral $ABCD$ such that $BC = 6$ cm, $AD = 7$ cm, angle $ABC = 100^\circ$ and angle $BAD = 80^\circ$. AB has already been drawn below.

For
Examiner's
Use

Answer

[2]

- (b) Measure and write down the length of the diagonal AC .

Answer $AC =$ _____ cm [1]

- (c) Measure and write down the size of angle ADC .

Answer angle $ADC =$ _____ $^\circ$ [1]

For
Examiner's
Use

- 16 $ABCD$ is a kite. $CDFG$ is a parallelogram.
 $GB = BC = 3$ cm, angle $BCA = 60^\circ$ and area of triangle $ABD = 12$ cm².

For
Examiner's
Use

- (a) Find
 (i) AB ,

Answer $AB =$ _____ cm [1]

- (ii) angle CBE .

Answer angle $CBE =$ _____ $^\circ$ [2]

- (b) Find the area of parallelogram $CDFG$.

Answer _____ cm² [2]

End of Paper

END-OF-YEAR EXAMINATION 2020

**SECONDARY ONE
EXPRESS**

**MATHEMATICS
PAPER 2**

1 HOUR 15 MINUTES

Candidates answer on the Question Paper.

READ THESE INSTRUCTIONS FIRST

Write your index number and name on all the work you hand in.
Write in dark blue or black pen.
You may use an HB pencil for any diagrams or graphs.
Do not use staples, paper clips, glue or correction fluid.

Answer **all** questions.

If working is needed for any question it must be shown with the answer.

Omission of essential working will result in loss of marks.

The use of an approved scientific calculator is expected, where appropriate.

If the degree of accuracy is not specified in the question, and if the answer is not exact, give your answer to three significant figures. Give answers in degrees to one decimal place.

For π , use either your calculator value or 3.142, unless the question requires the answer in terms of π .

At the end of the examinations, fasten your work securely together.

The number of marks is given in brackets [] at the end of each question or part question.

The total of the marks for this paper is 50.

For Examiner's Use

Answer **all** the questions.

For
Examiner's
Use

- 1 The first three terms in a sequence of numbers, $T_1, T_2, T_3, \dots$ are given below:

$$T_1 = 1 + 3 = 4$$

$$T_2 = 4 + 5 = 9$$

$$T_3 = 9 + 7 = 16$$

- (a) Find T_4 .

Answer $T_4 = \dots\dots\dots$ [1]

- (b) Find an expression, in terms of n , for T_n .

Answer $T_n = \dots\dots\dots$ [2]

- (c) Evaluate T_{40} .

Answer $T_{40} = \dots\dots\dots$ [1]

For
Examiner's
Use

For
Examiner's
Use2 Written as a product of its prime factors, $56 = 2^3 \times 7$.For
Examiner's
Use

- (a) Find k such that $56k$ is both a perfect square and a perfect cube.

Answer $k = \dots\dots\dots$ [1]

- (b) Express 42 as a product of its prime factors. Give your answer in index notation.

Answer $42 = \dots\dots\dots$ [1]

- (c) Find the highest common factor of 42 and 56.

Answer $\dots\dots\dots$ [1]

- (d) Two alarm clocks are set to ring at intervals of 42 minutes and 56 minutes respectively. If the alarm clocks ring together at 0830, at what time will they next ring together again?

Answer $\dots\dots\dots$ [2]

For
Examiner's
Use

- 3 Harry drives at an average speed of x km/h for half an hour and then for another 20 minutes at an average speed of $1.2x$ km/h.

For
Examiner's
Use

- (a) Find the distance travelled, in km, in the first half an hour.
Give your answer in terms of x .

Answer km [1]

- (b) Show that the total distance travelled for the whole journey is $0.9x$ km.

Answer

[1]

- (c) Given that the average speed for the entire journey was 80 km/h, form an equation in x and solve the equation.

Answer $x =$ [4]

- (d) Harry says that he will reach his destination earlier if he drives at a **constant** speed of 80 km/h.
Is his statement reasonable? Explain your answer.

Answer.....

.....

.....

.....

.....

..... [1]

For
Examiner's
Use

4 The figure shows a solid metal in the form of a trapezoidal prism.

For
Examiner's
Use

- (a) Given that the volume of the solid is 1680 cm^3 , show that $x = 6$.

Answer

[2]

For
Examiner's
Use

- (b) Calculate the cost of painting the solid if the paint costs \$2 per cm^2 .

For
Examiner's
Use

Answer \$ [3]

- (c) The solid is then melted and made into cubes with sides of 5 cm.

Calculate the maximum number of cubes that can be made.

Answer [3]

For
Examiner's
Use

- 5 The variables x and y are connected by the equation $y = 2x - 6$.
The table shows some corresponding values of x and y .

For
Examiner's
Use

x	-3	-1	0	1
y	-12	p	-6	-4

- (a) Find the value of p .

Answer $p = \dots\dots\dots$ [1]

- (b) On the axes in the next page, plot the points given in the table and join them with a straight line. [2]

- (c) From your graph,
(i) write down the coordinates of the point where the line meets the x -axis,

Answer $(\dots\dots\dots, \dots\dots\dots)$ [1]

- (ii) find the value of x when $y = -2$.

Answer $x = \dots\dots\dots$ [1]

5(b) Answer

For
Examiner's
Use

- 6 The diagram shows part of a regular polygon $ABCDEF\dots$, which has 12 sides. BCX and EDX are straight lines.

For
Examiner's
Use

Showing your working, find
(a) angle XDC ,

Answer angle $XDC = \dots\dots\dots^\circ$ [2]

(b) angle DXC ,

Answer angle $DXC = \dots\dots\dots^\circ$ [1]

(c) angle BEF .

Answer angle $BEF = \dots\dots\dots^\circ$ [2]

For
Examiner's
Use

- 7 (a) The cash price of a new laptop is \$2499.
 Jim buys this computer on hire purchase.
 He pays a deposit of 10% of the cash price followed by 24
 monthly instalments of \$114 each.
- (i) Find the total amount that Jim will pay for the laptop.

For
Examiner's
Use

Answer \$ [2]

- (ii) Find the cost of buying the laptop on hire purchase as a
 percentage of the cash price.

Answer % [2]

- (b) \$6000 was deposited into a bank.
 The simple interest earned at the end of 8 years was \$72.
 Calculate the yearly interest rate given by the bank.

Answer % [2]

For
Examiner's
Use

- (c) Belle took a Mathematics test that consists of 2 sections. Section A has 20 questions and Section B has 10 questions. 1 mark is awarded for each question answered correctly.
- (i) She answered 80% of the questions in Section A correctly. Find the number of questions in Section A that she answered correctly.

For
Examiner's
Use

Answer [1]

- (ii) Find the percentage of the questions in Section B that she needs to answer correctly in order to score 70% for the entire test.

Answer % [3]

For
Examiner's
Use

- 8 The figure shows *Soda Can A*, which can be modelled as a cylinder of height 12 cm and radius 3 cm.

For
Examiner's
Use*Soda Can A*

- (a) Using the model, show that the volume of the *Soda Can A* is $108\pi \text{ cm}^3$.

Answer

[1]

- (b) Using the model, estimate the total surface area of the *Soda Can A*, in cm^2 .

Answer cm^2 [2]

For
Examiner's
Use

- (c) The figure shows another *Soda Can B*, which can be modelled as a cylinder of height 17.28 cm and radius 2.5 cm. The volume of the *Soda Can B* is $108\pi \text{ cm}^3$ and its total surface area is $98.9\pi \text{ cm}^2$.

For
Examiner's
Use*Soda Can B*

- (i) As a manufacturer of drink cans, which design will you use? Justify your answer.

Answer Soda Can because.....

.....

.....

.....

[1]

- (ii) The smaller the volume to surface-area ratio, the faster the soda drink can will cool down in the freezer. Determine which Soda Can will cool down faster in the freezer. Show your working clearly.

Answer Soda Can [2]
